# The Bindomatic 1000 – your compact companion, wherever you are

The Bindomatic 1000 is a manually operated machine with all the advantages of a good document binder – but it fits into the tiniest space! No larger than an A4 size folder, you will appreciate the fact that it is right by your side. Up to five documents can be bound at once, and the inbuilt cover size selector is always there to assist you. Bind between 1 and 120 sheets in covers measuring up to 12mm in spine width. And how long does it take to bind? Less than two minutes. If you want to remove or add sheets, simply re-heat the binding. Once you have finished, the Bindomatic 1000 shuts down automatically.

## Creating a professional impression is easy!

① Measure the set of paper with the cover size selector.

② Put the set of paper in a Bindomatic cover with the right spine width.

③ Place one or more documents in the Bindomatic 1000.

④ Press the red button to start binding. When the button turns off: move the documents to the cooling plate for a few minutes.

⑤ Congratulations – you have produced a professionally bound document in an instant!
